Complete details of ISIN wise is provided in Annexure-I

# **Rating Action/ Outlook**

Brickwork Ratings (BWR) has reaffirmed the ratings and placed the ratings on Credit Watch with Developing Implications by removing the outlook of bond issues of Corporation Bank as tabulated above. The reaffirmation continues to factor in the Government of India (GOI)'s support with equity stake of 93%, improved earnings and capital adequacy as of June 30, 2019, while business remains stagnant, has gross NPA of 15% and slippages of Rs.1399 Cr as of June 30, 2019. The Government of India (GOI) in August 2019 announced proposed amalgamation of 10 Public Sector Bank (PSBs) to form 4 PSBs.

<sup>\*\*</sup> BWR had rated upper tier 2 bonds of Rs. 1000 Cr, and Bank has confirmed that they have raised only Rs.500 Cr. ## Bank is yet to raise these bonds

Wherein, Corporation Bank and Andhra Bank is proposed to be amalgamated with Union Bank of India. The Board's of the respective Banks have accorded their in-principle approval for the proposed amalgamation during September 2019. Brickwork Ratings has taken note and placed the ratings of bonds of these banks on Credit Watch with Developing Implications. The amalgamation is expected to bring in synergies of technology and human resources, increase the business and asset size and improve upon cost efficiency through branch rationalisation and asset monetisation, and reduce dependencies on GOI for capital infusion, strengthen capital and thereby manage the asset quality. However, any extension in timelines for completion of amalgamation and the smooth transition of the amalgamation shall be the rating sensitivities. BWR shall continue to monitor the developments in these Banks and effect appropriate rating action.

BWR has also withdrawn the rating of Upper Tier II Bond issue of Rs.500 Cr and Innovative Perpetual Debt Instrument of Rs.300 Cr of Corporation Bank, as the Bank has redeemed the said issues through exercise of call option on completion of 10 years. The Debenture Trustee confirms of these redemptions.

### **Key Rating Drivers**

BWR has essentially relied upon the audited financials upto FY19 and unaudited financials of Q1FY20 of Corporation Bank, publicly available information and information/clarifications provided by the Bank's management.

# **Credit Strengths:**

- → Bank's Capital adequacy ratios of CRAR, Tier I and CET-1 of 12.01%, 10.62% and 10.49% are comfortable and above the regulatory requirement, as of Q1FY20
- → The Bank made Substantial provisioning in Q4FY19 and has resulted in improvement in Net NPA to 5.69%
- → The Bank has generated net profits of Rs.103 Cr in Q1FY20 after a huge net loss amounting to Rs.6581 Cr in Q4FY19
- → NII and Operating profits as of Q1FY20 has improved from Q4FY19, though it is lower than Q1FY19

#### **Credit Risks:**

- → As of Q1FY20, the Bank's business remains stagnant at Rs.3.07 lakh Cr (FY19: Rs.3.06 lakh Cr). CASA @ 29% has decreased from 32% in FY19
- → Cost to income ratio has increased to 50.61% as of Q1FY20 is higher than its amalgamating banks (Andhra Bank @ 44.6% and Union Bank of India @46.2%)
- → Asset quality issues remain a concern with Gross NPA of Rs.20,913 Cr and GNPA @15.44% as of June 30, 2019. However, the Provision Coverage Ratio of 83.57% is more than the PSBs average PCR of 74.05%. Fresh slippages or additional provisioning requirement on account of ageing of the NPAs remains a key monitorable.

# **Analytical Approach and Applicable Rating Criteria**

For arriving at its ratings, BWR has applied its rating methodology as detailed in the Rating Criteria detailed below (hyperlinks provided at the end of this rationale).

### **Rating Sensitivities**

The focus post amalgamation in the initial few months is likely to move from credit growth and investments to achieving synergies between the entities, enable better customer management, effect branch rationalisation and manpower optimisation;

The Combined entities will have bigger business size, ability to manage costs and improve profitability, reduce stress on the asset quality and strengthen the capital adequacy. However, the ability of the banks to stabilise operations and increase focus on business growth and investment within a year shall be beneficial for these entities, an extension of that time frame shall be a key rating sensitivity

**Positive:** Amalgamation of Corporation Bank with Union Bank of India is expected to be a credit positive for Corporation Bank. However, it can be strongly ascertained on receipt of consolidated financials of these amalgamating banks.

**Negative:** Prolongment of amalgamation process and delay in increasing the business growth may lead to rating action or revision in outlook

#### **Liquidity Position: Adequate**

Corporation Bank has adequate liquidity with the Liquidity Coverage Ratio of 150.53% against the minimum required of 100%. As part of Contingency Funding Plan, Bank maintains short term liquid assets and highly liquid government securities / bonds / debentures to the extent of Rs 4500 crore. Also Bank has made line of credit arrangements with other Banks. Liquidity of Public Sector Banks has always remained better than its counterparts in the Private Sector Banks.

#### **Key Covenants of the facilities rated**

Basel III compliant bonds are subject to guidelines/regulations of the Reserve Bank of India (RBI) and as detailed in term sheet of respective issues. BWR considers them as Highly Complex instruments in terms of published criteria. Bank has raised Basel III Tier II Bonds of Rs.500 Cr and proposes to raise the balance Rs.1000 Crores.
