* Instrument details are provided in Annexure-1

¹ Secured NCDs and unsecured subordinated debt

Rationale

The Negative outlook factors in the expected increase in challenges for Indiabulls Housing Finance Limited (IBHFL) in resource mobilisation and maintaining its asset quality. The ongoing legal proceedings (public interest litigation, PIL, filed against the company, which has been admitted in the Delhi High Court) are expected to further heighten the risk-averse sentiments of lenders/investors, thereby impacting the company's financial flexibility, notwithstanding the high liquidity cushion currently maintained by it. IBHFL maintained on-balance sheet liquidity of ~Rs. 18,000 crore (~20% of total assets) as on October 09, 2019, which covers its debt repayments for the next 12 months. The court has allowed the company's request for an early hearing of the PIL and the hearing has now been scheduled for October 24, 2019. ICRA will monitor the developments around the same. The long-term rating of IBHFL had earlier been placed under Watch with Developing Implications following the announcement of the merger proposal (the scheme) between IBHFL (along with its wholly owned subsidiary, Indiabulls Commercial Credit Limited) and The Lakshmi Vilas Bank Limited (LVB). ICRA notes that the amalgamation scheme has not been approved by the Reserve Bank of India (RBI) and consequently, the rating watch has been removed.

The operating environment for non-banking finance companies (NBFCs) and housing finance companies (HFCs), especially for entities with sizeable real estate exposure, has been challenging over the past four quarters. The resulting slowdown in disbursements by NBFCs and HFCs has constrained the funding access for the real estate sector (especially residential), which has already been facing a prolonged slowdown due to subdued sales. This is expected to heighten the portfolio vulnerability and pose greater challenges in maintaining the asset quality. ICRA notes that IBHFL has hitherto maintained a healthy asset quality, despite some deterioration in Q1 FY2020 (gross non-performing assets or GNPA of 1.47% of assets under management (AUM) as of June 2019, up from 0.88% as of March 2019). Going forward, IBHFL's ability to achieve timely exits/refinancing of the real estate exposures would remain important for maintaining the asset quality. ICRA takes comfort from the healthy asset quality of IBHFL's home loan portfolio, which accounted for ~66% of AUM as on June 30, 2019.

IBHFL's ratings continue to factor in its track record in the domestic mortgage finance industry as one of the three largest HFCs (AUM of Rs. 1,13,189 crore as on June 30, 2019), its increasing retail portfolio driven by the consistent performance of its housing finance segment, and the consequent improvement in the granularity of its overall book. The ratings also consider the company's healthy financial profile with adequate capitalisation and liquidity.

However, given the aforementioned challenges in fund raising and the increasing cost of funds, IBHFL's growth prospects and ability to maintain profitability are expected to remain constrained over the near to medium term. To partly overcome the funding challenges, IBHFL has been able to tap alternative sources of funding, especially the securitisation of assets (Rs. 60,781 crore raised during September 2018 to June 2019, of which ~Rs. 23,000 crore was through securitisation). The resultant contraction in IBHFL's loan book over the past two quarters, coupled with the higher cost of funds and provision expenses, led to a moderation in its profitability in Q1 FY2020. IBHFL reported return on assets (RoA) of 2.55% in Q1 FY2020 compared to 3.12% in Q1 FY2019 (YoY degrowth of ~24% in net profit in Q1 FY2020). Given the extant challenges, IBHFL's profitability is expected to remain rangebound over the near term, though it remains healthy compared to peers.

While assigning the ratings, ICRA has taken note of the concentration and credit risks associated with IBHFL's large ticket size commercial credit. Although the company has hitherto reported a healthy asset quality, its ability to maintain the same in light of the risk build-up in the real estate segment will be important from a credit perspective. ICRA also notes that while the Indiabulls Group has a presence in other businesses such as real estate and capital markets, these are managed independent of IBHFL. ICRA expects the businesses to continue to be operated independently without any intermingling of cash flows between IBHFL and any other Group or associate companies even in the event of distress.

Key rating drivers and their description

Credit strengths

Established track record in domestic mortgage finance industry as one of the three largest HFCs – IBHFL has a demonstrated track record in the housing finance business and a strong market position as one of the three largest HFCs with an overall AUM of Rs. 1,13,189 crore as on June 30, 2019. The company has reported consistent performance in its home loan business, reaching an AUM of Rs. 74,443 crore as on June 30, 2019 from Rs. 19,896 crore as on March 31, 2014, at a CAGR of ~29%. Supported by the healthy growth, the share of the home loan book in the company's AUM increased to 66% as of June 30, 2019 from 48% as of March 31, 2014. Though the AUM growth slowed down from Q3 FY2019 owing to liquidity issues faced by non-banking financiers, the disbursements are expected to pick up from Q2 FY2020. Going forward, given the focus on securitisation as a source of funding, IBHFL's loan book is expected to remain rangebound.

Adequate capitalisation levels – IBHFL remains well capitalised with a tangible net worth of Rs. 16,854 crore on a consolidated basis as on June 30, 2019. The company's total gearing was 5.83 times as on June 30, 2019 compared to 6.76 times as of March 31, 2019. Adjusting the cash and bank balances and investments, the company's net gearing was much lower at 4.14 times as on June 30, 2019 compared to 4.67 times as on March 31, 2019. IBHFL's capitalisation profile remains comfortable with a capital adequacy ratio (capital to risk-weighted assets ratio, CRAR) of 27.81% (nil risk weightage to mutual fund investments) as on June 30, 2019 (26.49% as on March 31, 2019 with Tier I: 19.81%), providing adequate cushion for growth while maintaining the regulatory capital adequacy requirement (12%). The flexibility to securitise a part of the loan portfolio provides the company with an alternate avenue for raising funds in addition to shoring up the return on equity (RoE).

Comfortable asset quality indicators, albeit with some deterioration in recent months – IBHFL’s reported asset quality remained comfortable with GNPA of 1.47% of AUM and net NPA (NNPA) of 1.10% of AUM as on June 30, 2019. However, the same deteriorated from 0.88% and 0.69%, respectively, as on March 31, 2019, largely driven by the corporate credit segment. In the key business segment of home loans, the company’s NPA remained very low at 0.39% as on June 30, 2019. While IBHFL follows adequate underwriting practices, the low delinquencies also reflect the relatively moderate level of portfolio seasoning given the long loan tenures.

Credit challenges

Expected increase in challenges in resource mobilisation due to ongoing legal proceedings – The operating environment has been challenging over the past nine months with a prolonged liquidity squeeze and the greater risk averseness of investors towards NBFCs and HFCs, resulting in challenges in fund raising. The recent PIL filed with the Delhi High Court against the company is expected to further constrain IBHFL’s financial flexibility and ability to raise funds. This will affect its profitability and growth prospects. The court has allowed the company’s request for an early hearing of the PIL and the hearing has now been scheduled for October 24, 2019. ICRA will monitor the developments around the same. To overcome the funding challenges till now, IBHFL has been tapping alternative sources of funding, especially the securitisation of assets (Rs. 60,781 crore raised during September 2018 to June 2019, of which ~Rs. 23,000 crore was through securitisation). The fund raise has helped IBHFL shore up liquidity and significantly reduce the share of CP in its overall borrowings. The company’s healthy on-balance sheet liquidity (Rs. 18,000 crore as on October 09, 2019) provides comfort. The resource profile, as on June 30, 2019, consisted of ~38% debentures and securities (~39% as on June 30, 2018), ~1% CP (~15%), ~35% bank loans (~34%), ~22% sell-downs (~10%) and ~4% external commercial borrowings (~2%).

Ability to maintain asset quality indicators in relatively risky large ticket commercial real estate and LAP portfolio – Loan against property (LAP) and corporate mortgage loans formed 18% and 16%, respectively, of the company’s AUM as on June 30, 2019. While the LAP segment is comparatively risky, IBHFL has strong systems and processes to manage this business. The corporate mortgage loan book includes lease rental discounting (LRD) loans to builders (50% of corporate loans as on June 30, 2019) and construction finance (50%). Given the large ticket size and the high inherent risks associated with these exposures, the corporate mortgage loan book remains exposed to concentration risks.

Moderation in profitability in current fiscal, given the decline in own-book portfolio following the increasing prominence of securitisation – On a consolidated basis, AUM declined by ~10% YoY in Q1 FY2020, while the loan book declined by 23% YoY. This, along with the higher cost of funds and provision expenses, impacted profitability in Q1 FY2020, as reflected by the decline in RoA to 2.55% in Q1 FY2020 from 3.13% in Q1 FY2019. Despite the reduction in Q1 FY2020, the profitability levels remained healthy compared to peers.

Liquidity position

Strong: IBHFL’s asset liability maturity profile as on June 30, 2019 showed a cumulative positive mismatch (cumulative inflows over cumulative outflows) in the up to 1-year bucket. With on-book liquidity of Rs. 18,000 crore as on October 09, 2019, IBHFL’s liquidity profile remains strong. Based on the repayment schedule provided in the micro ALM details as part of IBHFL’s Q1 FY2020 earnings update, its debt maturity over the next six months (October 2019 to March 2020) stands at Rs. 10,350 crore. The company has announced that a meeting of the Board of Directors has been scheduled for October 14, 2019 to consider buyback of equity shares. The quantum of buyback is not known currently. This proposal, if approved, could impact IBHFL’s liquidity profile.

Rating sensitivities

Positive triggers – The outlook may be revised to Stable if there is a significant and sustained improvement in resource mobilisation, with an increase in fund raising from well-diversified sources. An upgrade of the long-term rating in the near term is unlikely, given the challenging operating environment.

Negative triggers – ICRA could downgrade the ratings if the operating environment remains weak with continued challenges in fund raising, which would restrict IBHFL’s ability to lend or would lead to a deterioration in its liquidity profile. Pressure on the ratings could also arise if there is a material deterioration in the company's asset quality, affecting its financial profile.

Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	ICRA’s Credit Rating Methodology for Housing Finance Companies Financial consolidation and rating approach
Parent/Group Support	Not applicable
Consolidation/Standalone	To arrive at the ratings, ICRA has considered the consolidated financial profile of IBHFL. As on March 31, 2019, IBHFL had 14 subsidiaries and an associate. Details of these companies are provided in Annexure-2

About the company

Incorporated in 2005, IBHFL is a housing finance company registered with National Housing Bank. In March 2013, the parent company, Indiabulls Financial Services Limited, merged with IBHFL. The company provides mortgage loans, LRD and construction finance with a prime focus on the mortgage and home finance business. As on June 30, 2019, the company’s AUM was Rs. 1,13,189 crore.

On a consolidated basis, IBHFL reported a net profit of Rs. 4,091 crore on a total income base of Rs. 16,387 crore in FY2019 compared to a net profit of Rs. 3,895 crore on a total income base of Rs. 14,663 crore in FY2018. In Q1 FY2020, the company reported a net profit of Rs. 802 crore on a total income base of Rs. 3,886 crore. Its tangible net worth was Rs. 16,854 crore while CRAR was 27.8% as on June 30, 2019.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents
